Contents Volume 228 (2001)

THE 10TH INTERNATIONAL NITROGEN WORKSHOP

Copenhagen, Denmark, 23–26 August, 1999

Guest editors: E.S. Jensen and S. Recous

Preface 1

The impact of humans on the nitrogen cycle, with focus on temperate arable agriculture
D.S. Jenkinson **3–15**

Exchange of gaseous nitrogen compounds between agricultural systems and the atmosphere
A.R. Mosier **17–27**

Factors regulating the contributions of fixed nitrogen by pasture and crop legumes to different farming systems of eastern Australia
M.B. Peoples, A.M. Bowman, R.R. Gault, D.F. Herridge, M.H. McCallum, K.M. McCormick, R.M. Norton, I.J. Rochester, G.J. Scammell and G.D. Schwenke **29–41**

Nitrogen cycling in low input legume-based agriculture, with emphasis on legume/grass pastures
S.F. Ledgard **43–59**

Nitrogen management in 'adequate' input maize-based agriculture in the derived savanna benchmark zone of Benin Republic
B. Vanlauwe, K. Aihou, P. Houngnandan, J. Diels, N. Sanginga and R. Merckx **61–71**

Disproportionately high N-mineralisation rates from green manures at low temperatures – implications for modeling and management in cool temperate agro-ecosystems
J. Magid, O. Henriksen, K. Thorup-Kristensen and T. Mueller **73–82**

Simulation of C and N mineralisation during crop residue decomposition: A simple dynamic model based on the C:N ratio of the residues
B. Nicolardot, S. Recous and B. Mary **83–103**

Quantification of ammonia exchange between agricultural cropland and the atmosphere: Measurements over two complete growth cycles of oilseed rape, wheat, barley and pea
J.K. Schjoerring and M. Mattsson **105–115**

Advances in micrometeorological methods for the measurement and interpretation of gas and particle nitrogen fluxes
D. Fowler, M. Coyle, C. Flechard, K. Hargreaves, E. Nemitz, R. Storeton-West, M. Sutton and J.-W. Erisman **117–129**

Biosphere-atmosphere interactions of ammonia with grasslands: Experimental strategy and results from a new European initiative
M.A. Sutton, C. Milford, E. Nemitz, M.R. Theobald, P.W. Hill, D. Fowler, J.K. Schjoerring, M.E. Mattsson, K.H. Nielsen, S. Husted, J.W. Erisman, R. Otjes, A. Hensen, J. Mosquera, P. Cellier, B. Loubet, M. David, S. Genermont, A. Neftel, A. Blatter, B. Herrmann, S.K. Jones, L. Horvath, E.C. Führer, K. Mantzanas, Z. Koukoura, M. Gallagher, P. Williams, M. Flynn, and M. Riedo **131–145**

Volume 228 No. 2

Effects of soil pH and nitrogen fertility on the population dynamics of *Thielaviopsis basicola*
U.J. Harrison and H.D. Shew **147–155**

Changes in soil mineral nitrogen during and after 3-year and 5-year set-aside and nitrate leaching losses after ploughing out the 5-year plant covers in the UK
A.G. Chalmers, E.T.G. Bacon and J.H. Clarke **157–177**

Root and microbial involvement in the kinetics of ^{14}C-partitioning to rhizosphere respiration after a pulse labelling of maize assimilates
C. Todorovic, C. Nguyen, C. Robin and A. Guckert **179–189**

Plant species and nutritional-mediated control over rhizodeposition and root decomposition
T.A.J. Van der Krift, P.J. Kuikman, F. Möller and F. Berendse **191–200**

Factors controlling the timing of root elongation intensity in a mature upland oak stand
J.D. Joslin, M.H. Wolfe and P.J. Hanson **201–212**

Development of a novel method to measure NH_3 fluxes from grass swards in a controlled laboratory environment (a mini-tunnel system)
C.A. Ross and S.C. Jarvis **213–221**

Short-term effects of Al^{3+} on the osmotic behavior of red beet (*Beta vulgaris* L.) protoplasts
Y.-S. Lee, G. Mitiku, and A.G. Endress **223–232**

Zinc fertilisation increases tolerance to *Rhizoctonia solani* (AG 8) in *Medicago truncatula*
T.C. Streeter, Z. Rengel, S.M. Neate and R.D. Graham **233–242**

Extraction of P solubilizing active substances from the cell wall of groundnut roots
R. Shen and Noriharu Ae **243–252**

Low-P tolerance by maize (*Zea mays* L.) genotypes: Significance of root growth, and organic acids and acid phosphatase root exudation
A. Gaume, F. Mächler, C. De León, L. Narro and E. Frossard **253–264**

Destructive and non-destructive measurements of residual crop residue and phosphorus effects on growth and composition of herbaceous fallow species in the Sahel
B. Gérard, P. Hiernaux, B. Muehlig-Versen and A. Buerkert **265–273**

Laboratory experiments imply the conditionality of mycorrhizal benefits for *Salix repens*: role of pH and nitrogen to phosphorus ratios
E.W. Van der Heijden and Th.W. Kuyper **275–290**

The use of phospholipid fatty acids (PL-FA) in the determination of rhizosphere specific microbial communities (RSMC) of two wheat cultivars
H.G. Diab El Arab, V. Vilich and R.A. Sikora **291–297**

Effect of tillage and farming system upon VAM fungus populations and mycorrhizas and nutrient uptake of maize
L. Galvez, D.D. Douds, Jr., L.E. Drinkwater and P. Wagoner **299–308**

Volume Contents **309–311**

Author index **313**

Instructions for authors **315–321**
